What is Architecture?

The science and art of designing buildings, homes, schools, churches, and other manmade spaces is called architecture.

People who practice architecture are called architects. Architects express an artistic vision by choosing the size, shape, color, materials, and style of a space.

Can you name these architectural landmarks?

What is Environment?

All the physical surroundings on Earth are called the environment. The environment includes everything living and everything nonliving.

The **natural environment** includes the air, water, minerals and organisms surrounding us. The **built environment** includes all the things we make through architecture.

Can you circle the items to the right from our natural environment?
